Does this have anything to do with revising the 1LB waiver?

***EPA Seeking Comments on Cellulosic Biofuel, E15 Collection Requests

EPA is seeking public comments on a planned new information collection request related to cellulosic production volume projections, as well as collection on E15, according to two Federal Register notices to be published on Tuesday.

Specifically, "EPA is seeking to collect information from potential cellulosic biofuel producers to aid in determining the annual volume standards," the advanced Federal Register notice explained. "This ICR [information collection request] includes a questionnaire form to facilitate the collection of this information. EPA would also like to use a data form to collect information from certain ethanol producers and importers who have requested and been approved to use an 'efficient producer' pathway. This data form would standardize collection of selected data points and allow better and more efficient compliance with the RFS program. We inform respondents that they may assert claims of business confidentiality (CBI) for information they submit," the notice added.

EPA will accept comments on its plan for 60 days after Tuesday's publication in the Federal Register. To submit comments, visit www.regulations.gov, using the Docket ID No. EPA-HQ-OAR-2015-0207.

Meanwhile, EPA is also seeking comment on an E15 ICR. Several years ago, EPA approved waivers that allow for gasoline up to E15 in 2001 and later model year vehicles. "EPA issued the final rule establishing several measures to mitigate misfueling of other vehicles, engines and equipment with E15 and the potential emissions consequences of misfueling," the advanced Federal Register notice explained. "The rule prohibits the use of gasoline containing more than 10 vol% ethanol in vehicles, engines and equipment that are not covered by the partial waiver decisions. The rule also requires all E15 gasoline fuel dispensers to have a specific label when a retail station or wholesale-purchaser consumer chooses to sell E15. In addition, the rule requires that product transfer documents specifying ethanol content and Reid Vapor Pressure accompany the transfer of gasoline blended with ethanol, and a survey of retail stations to ensure compliance with these requirements. The rule also modifies the Reformulated Gasoline program by updating the Complex Model to allow fuel manufacturers to certify batches of gasoline containing up to 15 vol% ethanol. This ICR supporting statement addresses associated recordkeeping and reporting items," the notice added.

EPA will accept comments on this plan for 60 days after Tuesday's publication in the Federal Register. To submit comments, visit www.regulations.gov, using the Docket ID No. EPA-HQ-OAR-2015-0202.
